Question: 1

Which three are scenarios where Managed File Transfer (MFT) is a valid approach?

- A. Oracle MFT can be used in conjunction with Oracle Integration Cloud (OIC) to push files for processing by OIC.
- B. Many SaaS applications still use files as a means for sharing data, so MFT capabilities are still very important.
- C. File adapters remove the need to ever have to use MFT.
- D. In integration scenarios where it is important to use either compression and/or encryption in the transfer process.
- E. File Transfer is an old, outdated method of sharing information and should not be used.

Answer: A, B, D

Question: 2

Which four statements are correct regarding the differences between WSDL/SOAP and REST/JSON?

- A. REST is typically invoked with HTTP verbs.
- B. WSDL is simpler, REST is richer
- C. Modern API-First architectures prefer to use the old-and-true WSDL/SOAP services over REST services because they are richer and provide a tighter contract
- D. WSDL is a request for a service; REST is a request for a resource
- E. WSDL is a tight contract; REST is a loose contract
- F. REST is more easily used in developing UIs than WSDL/SOAP. REST is gaining popularity in application development.

Answer: B, C, D, F

Question: 3

Which three are types of certificates that can be imported from Settings?

- A. Identity Certificate
- B. Multi Domain SSL Certificate
- C. Trust Certificate

- D. Message Protection Certificate
- E. Unified Communications Certificate

Answer: A, C, D

Explanation:

Reference:

<https://docs.oracle.com/en/cloud/paas/integration-cloud-service/icsug/managing-security-certificates.html#GUID-9F6A7704-A8DE-484E-8D8A-06D51AD9D13C>

Question: 4

You are implementing a synchronous OIC integration flow that is processing file records within a While loop action. At the end of each loop, you want to delay processing of the next record for a certain period of time.

Which is a valid consideration for the Wait action?

- A. The maximum wait time cannot exceed two minutes when configuring a Wait action in a synchronous flow.
- B. The minimum wait time cannot be less than five seconds when configuring a Wait action in any integration flow.
- C. The Wait action cannot be used in a synchronous flow.
- D. The Wait action can only be positioned as the last action in the loop.

Answer: D

Question: 5

Which built-in API platform policy lets you manipulate the request context?

- A. Application Rate Limiting Policy
- B. Key Validation Policy
- C. Redaction Policy
- D. Groovy Script Policy

Answer: D

Explanation:

https://docs.oracle.com/cd/E83857_01/paas/api-platform-cloud/apfad/using-oracle-api-platform-cloud-service.pdf

Question: 6

Which two statements are true regarding mapper activity?

- A. You can drag and drop a source on to multiple targets.
- B. You cannot drag and drop a source on to a target that is already mapped.
- C. You can drag and drop function activity in the target.
- D. You can drag and drop switcher activity in the target.

Answer: C, D

Question: 7

You are designing a new integration in OIC that needs to expose a REST-full interface trigger for client applications.

When choosing request and response options using the REST Adapter Endpoint Configuration Wizard, which is a valid consideration?

- A. Both standard and custom HTTP headers can be defined for either the request or response.
- B. File attachments can be accepted as a request option for the Trigger interface, but you cannot include attachments as a response to the client.
- C. If you select a PUT or POST action (HTTP method), you must define a JSON response payload format.
- D. Although you can define both query and template parameters, only template parameters will be available for mapping in the mapper because query parameters are considered optional.

Answer: C

Question: 8

What are the three main features of Oracle Integration Cloud (OIC)?

- A. Blockchain application development
- B. Internet of Things (IoT) application development
- C. Web and mobile application development
- D. API management
- E. Application integration
- F. Digital assistant application development
- G. Business process automation

Answer: AFG

Question: 9

Which two are NOT default start and end events in the Processes feature of Oracle Integration Cloud?

- A. SOAP start and SOAP end event
- B. Folder start and None end event
- C. Message start and Message end event
- D. Task start and end event
- E. None start and end event

Answer: AD

Explanation:

<https://docs.oracle.com/en/cloud/paas/integration-cloud/user-processes/define-process-start-and-end.html#GUID-E3E20D7C-D135-419C-8750-F8D9147590D8>

Question: 10

You are developing orchestration-style integrations in the OIC Designer Portal and have discovered that the Outline View is not available in your OIC instance environment.

What is the name of the feature flag you will need to request to be enabled by raising a Service Request from My Oracle Support?

- A. oic.console.integration.outlineview
- B. oic.ics.console.integration.layout
- C. oic.console.integration.outline
- D. oic.console.integration.pseudoviewl

Answer: B
