**Question: 1**

---

Your customer has run into an issue while troubleshooting survivorship rules in their Oracle Customer Data Management staging instance which they recently configured. Now they are intending to move toward production, but discovered that the survivorship rules are not working anymore. They checked the Manage survivorship rules and all appears to be in place, but they are not functioning.

- A. As an implementation advisor, which two will you suggest to resolve this issue? (Choose two.)
- B. Check the merge resolution and run request dispatch job status.
- C. Check whether the CDM\_ENABLE\_SURVIVORSHIP profile option is set.
- D. Check whether survivorship rules are in the active state.
- E. Check whether the ZCH\_Enable\_SURVIVORSHIP profile option is set.
- F. Check whether the CDM\_SURV\_ENABLE profile option is set.

---

**Answer: C, D**

---

---

**Question: 2**

---

While implementing Oracle Customer Data Management, your customer noticed that their production instance has 1000 plus incorrect addresses as part of the address load. The customer is planning to update these invalid addresses in Oracle Customer Data Management.

As an implementation advisor, what would you suggest to help the customer avoid such issues in future?

- A. Use Oracle Enterprise Data Quality (EDQ), which will auto-correct invalid addresses.
- B. Provide the corrected addresses in the CSV format for reload.
- C. Manually correct all incorrect addresses in the instance.
- D. Subscribe to Oracle Address Verification CloudService.

---

**Answer: D**

---

---

**Question: 3**

---

You have configured Product Catalog and created many Product Groups. However, you are unable to search products under revenue line.

What should be done to enable this?

- A. Product Group Hierarchy must be restructured.
- B. Service Product Group Usage must be defined.
- C. Base Product Group Usage must be defined.
- D. Opportunity Management Alternate Catalog must be defined.

---

**Answer: A**

---

---

**Question: 4**

---

A client is implementing Oracle Sales Cloud along with Oracle Customer Data Management (CDM). The data migration scope has around 10 million records in Contacts and Accounts, and a large percentage of duplicates is expected during initial data load. The client is asking for your recommendation to improve the performance of the duplication data identification and resolution process.

Which two would you recommend to the client? (Choose two.)

- A. Set ORA\_ZCH\_MERGE\_SCOPE\_LOOKUP to "CRM" instead of "ALL".
- B. Set ORA\_ZCH\_MERGE\_MAX\_REQUEST\_LIMIT to less than "10" during initial data load.
- C. Set ORA\_ZCH\_SETMASTER\_LOOKUP to "Rule" during initial data load.
- D. Decompose the data sets into smaller chunks by the selection criteria while submitting a duplicate identification batch.

---

**Answer: B, D**

---

---

**Question: 5**

---

In Oracle Sales cloud, a Sales Cloud object can have a maximum of how many fields?

- A. 725
- B. 675
- C. 325
- D. 625

---

**Answer: D**
